

5 BOLD GOALS

Through the analysis of the data and information, College Leaders landed on 5 Bold Goals toward the future for BSCC that would have transformational impact to the operation and overall success of the college for 2016-2020.

1 Develop One-stop Centers on all BSCC Campuses...

The one-stop centers will co-locate student services (financial aid, admissions, and records), testing, advising, business office, ADA, etc. The intent is to reinvent the student experience in a way to drive stronger student enrollments, retention, and completion.

This step links to our vision elements of instruction, student experience, and finance/advancement.

2 Re-Imagine Developmental Education...

Based off the compelling nationwide evidence, BSCC will move toward the fast-tracking of developmental education courses so students do not waste time, motivation, and financial aid by enrolling in developmental courses. Cut scores will be established locally to determine the need for mandatory support for students enrolling in the required credit bearing courses which lead to the completion of the desired academic credential.

This step links to our vision elements of instruction, workforce pipeline development, student experience, and finance/advancement.

3 Strategic Enrollment Management...

Although BSCC has engaged in enrollment management since 1992, the College needs to become more “strategic” and to implement a comprehensive approach to enrollment management that would pull in and hold responsible all functional areas of the college including administration, student services, instruction, and marketing & public relations. This will be accomplished through a variety of tools including leveraging technology and highly focused professional development for faculty and staff.

This step links to our vision elements of instruction, workforce pipeline development, student experience and finance/advancement.

4 Reinvent BSCC Workforce Solutions, Community & Economic Development...

The College needs to ensure that BSCC is “the” provider of workforce development solutions for the service area and beyond through aggressive and strategic worker pipeline development and through customized business & industry training. This will entail a reorganization of our leadership in these areas which is critical to meet the needs of our community, economic development, and business & industry partners.

This step links to our vision elements of instruction, community, workforce pipeline development, workforce solutions-customized training, economic development, student experience, and finance/advancement.

5 Rethink all Financial Strategies...

BSCC will conduct a comprehensive audit of all revenues and expenditures to determine the most effective pathways toward efficiency but also toward efforts to support innovation. We also aggressively pursue external funding to expand BSCC’s capacity in becoming the leading innovator for education, workforce solutions, and community and economic development for our service area and beyond.

This step links to our vision elements of instruction, community, workforce pipeline development, workforce solutions-customized training, economic development, student experience, and finance/advancement.
