

Bevill BEST Robotics

BEST Robotics is a program designed to stimulate Middle and High School students interest in Science, Technology, Engineering, Art and Mathematics (STEAM). Teams of students are given a kit of materials with which they build a robot to perform well defined tasks. Teams document their design process and give a marketing presentation about their robots. Kits are provided by the HUB at no cost to the school.

Please note that there will NOT be an early on-line kickoff this year.

Summer

Sensor Workshop: Monday June 24 1:00-4:00 pm

Location: Electronics Lab

BEVILL BEST Kickoff

Friday September 13, 2019 9:00 -11:00 am
